

*Winona Van Norman's VSG-4720 has enough spindle-to-table clearance to machine all the old - style blocks with valve seats including Ford 8N tractor engines and any other flathead engine.*

*Rottler's SGF-8 seat and guide machine can handle a wide variety of cylinder heads from motorcycle heads to CAT 3406E heads. It features a fixed carbide pilot centering system, air float workhead with foot pedal control for hands free air clamping and digital electronic level for quick, precise alignment of fixed pilots.*
