

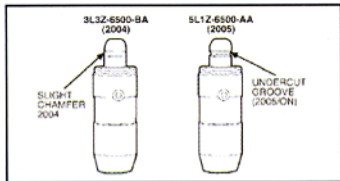

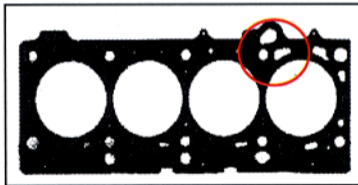

**Figure 1** Camshaft identification is made by location of the VCT pin. At top, 2004 camshafts are shown; at bottom, 2005 camshafts are identified.

**Figure 2** A groove in the lash adjuster will identify 2004 or 2005 components.

**Figure 3** The 2002 Chrysler 2.4L head gasket was revised for a larger oil drain hole. The circle indicates the revision.
